- Loss of income due to damage or repairs to the infrastructure/wind turbines (partially compensated by insurance/manufacturer)
- Loss of income due to maintenance or service calls by the manufacturer (partially compensated by availability guarantee)
- Standstills due to unexpected technical problems with wind turbines (compensated within the manufacturer's availability guarantee)
- Lost electricity production due to conditions imposed under licensing law (bats, shadows, noise, etc.) (not compensated)
- Amount of electricity fed into the electricity grid that is remunerated by the grid operator and the direct marketer
- ◆ Forecast (P75): prognosted yield according to prestart reports
